

Inflasolve Organic Extract is formulated to reduce systemic inflammation that is a root cause of aging (called “Inflammaging”). It contains phytotherapeutic extracts of: *Curcuma longa*, *Boswellia sacra*, *Salix alba*, *Camellia sinensis* and *Cinnamomum verum*. This formula is a synergistic herbal analog providing anti-inflammation support for all human cells and organ functions.

The curcumin in turmeric has antioxidant, antiseptic, antifungal and anti-inflammatory properties. **Inflasolve Organic Extract** is noted for its high bio-availability, due to employing reflux extraction protocols, using long-duration heat and cane alcohol with deep ocean minerals. Curcumin, an active ingredient in **Inflasolve**, has a relatively low absorption/bioavailability. In a very recent study, (Yang et al) showed that administration of 10 mg/kg of curcumin results in only 0.36 µg/ml of curcumin in the blood serum. However, “We report here that the water solubility of curcumin could be increased from 0.6 _ g/ml to 7.4 _ g/ml (12-fold increase) by the use of heat.” Improving the Solubility and Pharmacological Efficacy of Curcumin by Heat Treatment, Biji T. Kurien, Anil Singh, Hiroyuki Matsumoto, and R. Hal Scofield1, ASSAY and Drug Development Technologies

- **Inflasolve** relieves pain. The anti-inflammatory properties of *Curcuma longa*, *Boswellia sacra*, *Salix alba*, *Camellia sinensis* and *Cinnamomum verum* can speed up the body's healing process and relieve pain. Chronic and nerve-related pains can also be treated.
- **Inflasolve** reduces inflammation. Traditional medicine has recommended turmeric for treating inflammation. Turmeric has often been used to treat and even prevent arthritis and other incidences of chronic inflammation.

Curcuma longa, is an antioxidant, antiseptic, antifungal and anti-inflammatory.

Boswellia sacra, is an antioxidant, antiseptic, antifungal and anti-inflammatory.

Salix alba, inhibitor of COX-1 and COX-2, used to block inflammatory prostaglandins.

Camellia sinensis, has anti-hyperglycemia, antioxidative, anti-obesity and antitumor activities

Cinnamomum verum, has antioxidants, including polyphenols, phenolic acid and flavonoids.

Inflasolve is uniquely extracted from fresh Maui pedigree, Hawaiian-grown organic Turmeric root using organic cane alcohol and deep ocean mineral water, as the extraction solvent. Utilizing advanced all-glass apparatus **Inflasolve's** ingredients undergo hours of reflux extraction that applies heat and ethanol to enhance the bioavailability of the resultant extraction. The bioavailability has been increased as much as 3600% as compared to dry turmeric.

- **Highly bio-available due to heat and alcohol reflux extraction**
- Made from the extraction of **fresh Maui, Hawaii turmeric rhizome**.
- **Organic**, Non-GMO, Gluten free
- Extracted with **Maui-grown organic sugarcane alcohol** and deep ocean mineral water.
